The Grinch That Stole Christmas!

Retro Toy Sales are UP!

Rock'm Sock'm Robots, Barbie Dolls, a bicycle, skates, a basketball, game boards of all types; these were the gifts that Christmas was made of. Today the North Pole is equipped with a new kind of elf—one with a degree in electronics and tech gadgets!

Christmas lists today read something like this: Laptops and Game-Boys, and iPods and Zunes, Desktops and video games and Xboxes too! These tech gifts are sure to bring a smile to your tweens and teens face, but be careful for the Grinch which has no regard for your space!

Thank goodness parents are waking up, and realizing that all these tech gadgets are not making their kids any happier, in fact the contrary. Thus, we are seeing the revival of retro toys this Christmas; Lincoln Logs, GI Joe, and Easy Bake Ovens—to name a few, in a parent's hope to return to and transmit the simpler and fun times of their youth.
